

BB IP HOLDING CO PTY LTD

Public Ownership and Provenance Statement

ACN 702 091 021 ABN 77 702 091 021

BBIP-PUB-001 | Revision 1.0 | PUBLIC

Issued 6 September 2026

Statement

BB IP HOLDING CO PTY LTD is the current owner and controller of intellectual property and controlled business assets within the BDXT coded engineering portfolio to the extent those rights and assets were lawfully owned or controlled by Cameron Jay Buehl-Blair / Blair Drilling and Exploration Technology and were transferred under the founder-to-company assignment effective 6 September 2026.

The transfer does not purport to acquire rights that were not owned or transferable by the assignor. Third-party and open-source components, employer/client/site-specific records, restricted field datasets, externally controlled material, public/vendor material and unresolved-provenance material remain subject to their applicable ownership, licence and provenance boundaries.

Cameron Jay Buehl-Blair remains identified as the historical author, founder and originator of the programme. The transfer of eligible rights to the company does not rewrite historical authorship, conception dates, documentary chronology or pre-transfer evidence.

Public record

The public record is intentionally divided into historical and current-control layers:

- **5 September 2026 - BDXT-PUB-001 Rev1.2:** preserved pre-transfer public-sanitised technical disclosure and evidentiary record.
- **6 September 2026 - BDXT-PUB-001 Rev1.3:** post-transfer public revision identifying BB IP HOLDING CO PTY LTD as current owner/controller of eligible transferred IP while preserving the earlier chronology.
- **6 September 2026 - BBIP-PUB-001 Rev1.0:** this public ownership and provenance statement.

Controlled records

The executed assignment instrument, company resolution, internal IP/asset register, chain-of-title register, private technical records and custody/control baselines are controlled company records and are not published as part of the public release.

Their non-public status does not alter the public chronology. Public documents intentionally disclose only the ownership position, coded system identity, broad technical boundaries, maturity, chronology and selected cryptographic commitments necessary for a citable public record.

No expansion of technical claims

This statement does not expand the technical, regulatory, safety, metrology, patentability or commercial claims made in the public sanitised disclosure. Detailed implementation knowledge remains withheld.
